

QUICK ATS 128 mm

Quick air target simulator is non-guided rocket-target. Operators of army air defense systems use it for practicing the use of short range air defense rocket system. Shooting practicing is done with incoming (type A) and departing (type B) unguided rocket on ballistic trajectory.

TIP - A**TIP - B**

Technical data

Caliber	128 mm
Stabilizer range	270 mm
Length of rocket with tracer	1256 mm
Rocket mass, type - A	1305 mm
Rocket mass, type - B	34 kg
Mass of ignition charge	9,7 kg
El. resistance of the ignition circuit	1,25 Ω do 2,25 Ω
No. of tracers : type "A"	6 kom
No. of tracers : type "B"	4 kom
No. of modified IC-5 decoys	4 kom
Temperature range	30° do +50° C
